

TEAM COLLABORATION

Easily track client email communications including ones sent by an assistant or other member of the team. Everything gets tagged automatically to the client. Tasks can be assigned to multiple recipients and tagged to the client file with real-time updates and tracking. Send files securely over the Internet without worrying about email attachment size limits. Share documents, tasks, emails, calendar appointments plus more with ease.

CUSTOM SOLUTIONS

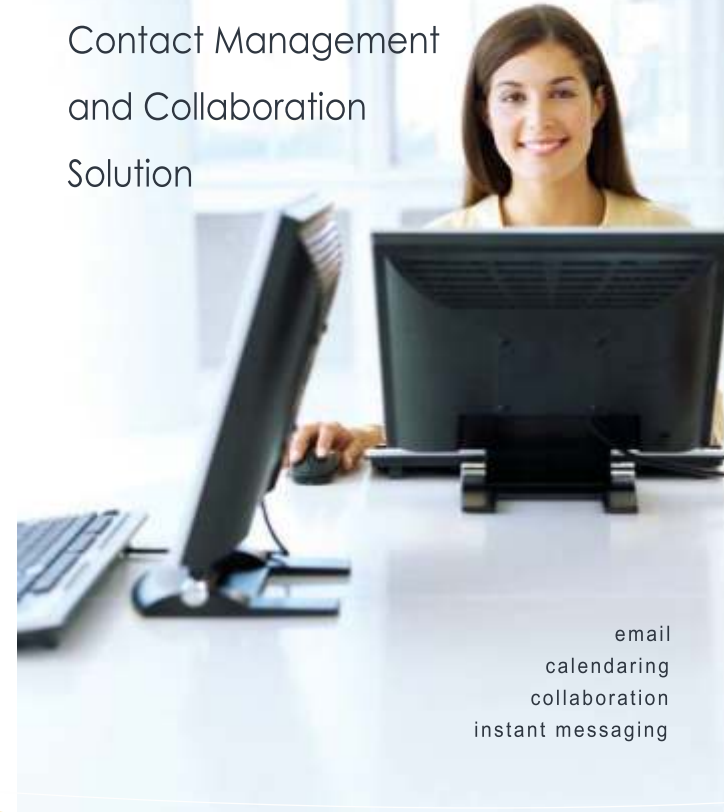

Branding is more than logos and graphics. UVC's pluggable architecture allows for easy integration with the company's back office system(s) and provides a look and feel that matches the brand and corporate identity. Leverage the scalability and availability that powers the UVC network within your environment.

CLOUD BASED COLLABORATION

UVC provides businesses with a feature rich collaboration application including full sharing capabilities for emails, calendars, tasks and notes.

INTEGRATION WITH BACK-OFFICE DATA

UVC integrates with back-office systems for real-time access to client data and provides an end-to-end solution without duplication of records or manual imports.

UVC provides the choice of running in a privately secured environment or hosted for minimal cost. Branding and white labeling options as well as extensive API access provide the ultimate flexibility needed to tailor the application for any business need.

Flexible solutions for Your business needs

APPLICATION FEATURES

UVC's state of the art technology bridges the gap between desktop software and web applications. It is a best of breed application that combines the sharing and ubiquitous access of web apps with the flexibility, productivity and offline access of desktop apps. The software includes the following modules: a contact manager, task and project management, group calendar, instant messenger, email and more. UVC combines freedom, flexibility and security by bringing together teams of people and allowing them to work together effortlessly regardless of their physical location.

Users love the accessibility and sharing features of UVC

- Rich application with drag and drop functionality
- Powerful search capabilities
- Automatic linking of emails to clients for full journal activities and history
- Snapshot view of a client's market value, KYC status and more inside the email window
- Enterprise grade calendaring for a fraction of the cost of Microsoft Exchange and other applications
- Unique and powerful collaboration including instant messaging and secure file transfer
- Share data easily with colleagues and team members
- Advanced customization options using UVC public framework API
- Over the air synchronization with mobile phone and tablet devices
