

## What's New – UVC Version 9.2 Update 2

### Enhancements

1. Added the option to view followups on shared contact lists in the calendar in addition to your own followups.

2. New option **Use "To" (Primary e-mail only)** when emailing multiple contacts.

3. Changed the notification window when user logs in to use a different image than new chat notification.
4. Improved the order of emails that show up in contact detail window.
5. Added new icon set for Inbox folders.
6. Improved all the UVC module icons to use a higher resolution on Windows 10.

### *Defect Corrections*

1. Fixed the issue where you would receive a warning to save changes on contacts even though changes were not made.
2. Show custom tabs on client notes even if user doesn't have access to owner.
3. Ticket module fixes and small enhancements.
